RE: Map 31 Lot 48
21 New Lane
Approval of Restoration Plan

Dear Mr. Doane,

At their meeting on August 24, 2021, the Commission approved Enforcement Order (EO) for mitigation of cutting in a 2,365 square foot area within the Buffer Zone to Town Cove on Tisbury Great Pond at 21 New Lane that was done without review and issuance of an Order of Conditions from the Conservation Commission. The EO was issued on September 2 and ratified by the Commission at their meeting on September 14. The EO required the approval of a restoration plan. Subsequently, the Commission conducted a formal public hearing on this matter which began on October 12 and was completed on November 29, 2021.

At the November 29 meeting, the Commission voted to approve to approve the restoration plan, the details of which are spelled out a written narrative and shown on a plan prepared by your consultant, Ox Bow Associates. This letter serves as approval of this restoration narrative and plan dated December 9, 2021 (the "Restoration Plan"), a copy of which is enclosed with this letter.

To summarize, the restoration plan allows for the planting of 2 White Oak and 2 Cedars and 18 shrubs the size and species of shrubs to be determined by you and your agent provided they are species native to Martha's Vineyard and taken from the approved list set forth in the Restoration Plan.

Prior to the commencement of work to implement the Restoration Plan, please have an orange construction fence placed 10 feet from the top of the bank (edge of wetland flagging) which will serve as the limit of work line and provide at least 72 hours' notice to the Commission office. Also submit a final plant list of the shrubs detailing the species, size and quantity of each. Nothing is to be planted on the water side of the limit of work line.

Upon completion of the plantings, provide notification and monitoring reports as set out in the monitoring section of the Restoration Plan.

Robert A. Doane, et al
